

Dear Hiring Manager,

I am applying for the Engineering Technician Intern. I first learned about Black & Veatch at the career fair last fall, and after researching the company further, it quickly moved to the top of my list. What stood out to me is that Black & Veatch is 100% employee owned as one of the largest ESOP companies in the U.S., which means every professional has a genuine stake in the quality of the work. That kind of ownership culture aligns with how I approach my own work: with accountability and a long-term mindset.

I am a Ph.D. candidate in Transportation Engineering at the University of Minnesota with a minor in Industrial Engineering. My background in infrastructure systems, analytical modeling, and design makes me well suited for this role. I have hands-on experience with AutoCAD and Civil 3D, strong skills in data analysis and problem-solving, and have managed multi-year infrastructure projects for the Minnesota Department of Transportation — from data collection and design through technical reporting and stakeholder delivery.

I am detail-oriented, self-motivated, and comfortable working both independently and across teams. I would be excited to contribute to Black & Veatch's infrastructure projects this summer and learn from a company with over 100 years of engineering excellence.

Sincerely,

Maziar Zamanpour
